

Tomlin Hall Annual Parish Meeting Report 2023/4

There has been little change since the report for 2022/3. On the one hand this is a good thing in that the use of the Hall, and its day-to-day financial position is reasonably robust. We have been able to weather increased electricity prices. We now have an additional Pilates session per week, the car park has been enlarged, and the village green has been established beyond the car park boundary. However, the boundary itself has not been re-established, the hall shed has not been replaced, and the path across the green does not go where we anticipated.

With respect to the refurbishment/renovation the hall remains in a state of waiting. The parish is a partner in this enterprise. We have planning permission, we have an agreement about managing the process, but as yet we have no movement.
